

<p>R.E.</p> 	<p>We will be suggesting a reason why Muslims and Christians like to help the poor, by making a link between their own ideas about wealth and poverty and the work of one of the charities. We will describe a project of Christian Aid or Islamic Relief and its importance and value.</p> <p>We will think about being able to empathise with the plight of those suffering in the world, as well as grasp what it is to be moved with compassion to act to serve others, as well as recognising the value of commitment to alleviating the suffering of others.</p>
<p>PSHE</p> 	<p>In PSHE we will be following the JIGSAW whole school scheme of work. The second unit of the summer term is called: Changing Me.</p> <p>Children will be learning about having a positive self-image, how to develop their self-esteem and identify what they are looking forward to as they grow up. They will also begin to learn about the changes that take place in the body during puberty and learn how to be confident about these changes.</p>
<p>P.E.</p> 	<p>Children will begin swimming sessions by learning how to swim competently, confidently and proficiently over a distance of at least 25 metres. They will use a range of strokes effectively (for example, front crawl, backstroke and breaststroke) and perform safe self-rescue in different water-based situations.</p> <p>In addition to this, children will also develop their outdoor adventure skills and knowledge using orienteering.</p>
<p>Geography</p> 	<p>This was a focus last half-term.</p>

	<p>In music, we will be exploring the theme of happiness. We will learn how to sing in unison and to sing solo in a group of 5 songs. In addition to this, we will listen, compose and appraise our own songs based on pop and neo soul.</p>
<p>Computing</p> 	<p>In computing we will develop an understanding of how technology works and how computers process instructions and commands by creating/editing/refining more complex sequences of instructions for a variety of programmable devices. Everyone will learn to write a simple program/create a simple animation that includes count-controlled loops, by connecting more than one output component to a microcontroller and using a count-controlled loop to control outputs.</p>
<p>History</p> 	<p>In history, we will be learning about the ancient Egyptians. We will begin by understanding the chronology of significant events and individuals in ancient Egypt, as well as learning about their practices and beliefs. We will explore the work of archaeologists and how they have discovered ancient Egypt.</p>
<p>MFL</p> 	<p>As part of modern languages, we will be continuing learning French. We will learn to talk about weather and seasons in French. We will also learn about more about visiting different areas in France and the weather and seasons found in these. Our learning will mostly be through practical activities such as art, music, games and drama.</p>

Additional Information- Our P.E sessions are every Thursday and Friday.

Please remember all children need to bring in swimming costumes/trunks and a towel every Thursday. Children should come into school on a Friday wearing their school PE kits, with their uniform in their bags. PE kits will be sent home for washing on the same day.

Miss Goring and Miss Tibbetts
